Engage Your People

Engaged employees wholeheartedly give discretionary effort to help the organization succeed. Traditional engagement surveys only measure group engagement issues, ignoring the crucial individual data and assuming that managers are solely responsible for engagement.

Harrison's approach to Engagement measures individual engagement as well as group engagement and is based on the assumption that engagement is a shared responsibility between the employee and the organization.

Measure employees fit for the job, their important expectations and their current fulfillment levels as a means to facilitate the realistic conversations needed between employee and manager.

Leadership and Succession Planning

Managing the talent pipeline is more critical than ever. The Harrison Assessments system provides the ability to predict an individual's likelihood of success at multiple levels within an organization and create a developmental plan to accelerate their progress.

Talent Management:

- Identify high potential candidates
- Predict multi-level capabilities
- Create accelerated development plans
- · Identify alternate career paths
- Leverage the talent pool
- Increase retention

Team Development

In today's specialized work environment, talent is not enough. Talented people must effectively work together in order for the organization to succeed. Harrison Assessment's Paradox Theory reveals team dynamics in a way that has never before been possible, enabling individual team members to easily identify how their own behaviors contribute or obstruct the team objectives. It also provides a step-by-step plan in which each team member can make adjustments to facilitate optimal team performance.

A team building tool to:

- · Create teams with effective interactions
- Discover the strengths and challenges of a team, including team decisionmaking potential
- Identify the best roles for each team member
- Assess the potential for cooperation or conflict
- Establish clear guidelines for effective interactions

What Makes Harrison Solutions Unique

Eligibility Factors | Suitability Factors

Eligibility and Suitability

The ability to predict job performance is dependent upon identifying all of the critical factors. Assessing Eligibility or technical competencies alone only represents a portion of the critical factors to predict performance. When behavioral competencies are also measured, such as emotional intelligence, personality, and work preferences, a high degree of accuracy is attained to predict individual performance in specific jobs.

Enjoyment Performance Theory

Enjoyment Performance Theory states that an individual will perform more effectively in a job if they enjoy the tasks required by that job, have interests that relate to the position, and have work environment preferences that correspond with the environment of the workplace.

Harrison Assessment's global research indicates that the enjoyment of these various aspects of a job is highly correlated with good performance.

"If you enjoy an activity, you tend to do it more. By doing it more, you tend to learn and improve the related skills. As a result, you tend to gain recognition (including self recognition) which helps you enjoy the activity more."

Cognito I Beratung & Training Phone +4915158814318 Email info@cognito-beratung.de https://leadershipdevelopment-cognito.harrisonassessments.eu

Paradox Technology

Only Harrison Assessments' Paradox Technology can determine if a strong trait is a true strength or a potential derailer. Applied across twelve paradoxical behaviors it provides a framework for true personal development by providing insight into why we behave the way we do, how we react under stress and how to recognize and avoid potential behavioral pitfalls.

Every trait can be a strength or a derailer depending if the trait is balanced by another seemingly opposite (paradoxical) trait. For example, if a person is strong in both Frankness and Diplomacy, both will be genuine balancing strengths when communicating. On the other hand, if a person has only one of the paradoxical traits, there will necessarily be a related counter-productive behavior, the strength of which depends on the extent of the imbalance. For example, a person with very strong Frankness and weak Diplomacy, will have a strong tendency to be disruptively Blunt which leads to unnecessary upsets, mistrust, and employee turnover. Conversely, a person with very strong Diplomacy and weak Frankness, will have a strong tendency to be Evasive when communicating, causing confusion and unresolved issues. In some cases, the person is weak in both Frankness and Diplomacy indicating they will try to Avoid Communication. The key is to appreciate and strengthen both sides of the paradox.

Achieve Solid Business Results

- Create a more accurate and efficient Selection process
- Improve strategic workforce and succession planning by accurately identifying and developing high potential employees
- Improve employee productivity, satisfaction, and retention through better employee job fit
- Increase effectiveness through targeted coaching, development, and performance management by identifying behavioral traits correlated with specific jobs and customizing behavioral competencies to your company's needs
- Increase team productivity by improving working relationships and leveraging team member strengths
- Increase efficiency of assessment using a single 25 minute SmartQuestionnaire to create multiple reports and applications

Harrison Talent Life Cycle Solutions

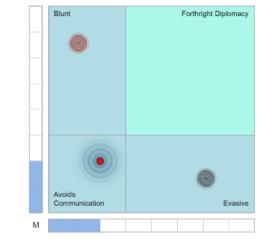

Harrison Assessments uses predictive analytics to help organizations acquire, develop, lead and engage their talent. This comprehensive Talent Decision Analytics provides the intelligence needed throughout the talent life cycle to build effective teams and develop, engage and retain key talent. Contact us to learn how we help organizations make great decisions.
